Abhishek Kumar

Full-stack developer · Ranchi, Jharkhand, India

abhaspik@gmail.com · github.com/misanthropic-codes · linkedin.com/in/abhishek-codes

I'm a full-stack developer. At AlphaPe in Noida I work on the FastAPI backend and the React Native app, and I lead development at Fixxer, a platform for appliance repairs and spare parts. I'm also studying Electrical Engineering at HIT Haldia.

EXPERIENCE

SDE Intern, Anabin Technologies (AlphaPe)

2026-03 – Present · Noida · Onsite · Full-time

AlphaPe teaches school and college students how money works, through lessons, quizzes, quests and an 8-day money simulation. I own core backend systems in FastAPI and MySQL (profile versioning, simulation scoring, payments and admin tooling) and built most of the mobile app.

Lead Full-stack Developer, Busigrow (Fixxer)

2026-04 – Present · Part-time contract

Fixxer books appliance repairs and sells spare parts. I lead development and wrote most of the NestJS backend and the Next.js web app.

Co-Founder & Developer, BullBear.Ai

2025-06 – Present · Remote

BullBear.Ai is an early-stage AI trading-analysis product. I co-founded it and build the product.

Frontend Developer, CrackIIT: JEE Smashers

2024-05 – Present · Remote

CrackIIT runs JEE coaching and mentorship. I built its website and keep it up to date.

Web Developer, GDG on Campus HIT

2024-11 – Present · Haldia

I build the GDG on Campus HIT website with the chapter's tech team, and built its recruitment platform.

Web Developer, The HIT Times

2024-12 – Present · Haldia

The HIT Times is the campus media body at HIT. I work on its website and admin portal with the rest of the web team.

Young Innovator Intern, Scaler

2024-06 – 2024-09 · Remote

Summer internship in Scaler's Young Innovator programme, working on education projects in small teams.

PROJECTS

GDG Recruitment Platform (2025)

Next.js, NextAuth, Prisma, PostgreSQL

Recruitment system for GDG on Campus HIT. Applicants apply through one form, recruiters track every application, and admins promote the people they select to team members.

FinAI (Hackfest 2025, IIT Dhanbad) (2025)

Next.js, Node.js, Express, MongoDB, Python, Flask, scikit-learn

Portfolio tracker with an ML risk model, built in 36 hours at Hackfest 2025, IIT Dhanbad. It prices holdings live from Yahoo Finance and gives each stock a risk score.

SkillSync (2025)

Next.js, TypeScript, Tailwind CSS, Radix UI

Frontend prototype of a teammate finder for hackathons. Search people by skill, open their profile and message them.

Campus Connect (2024)

React, Vite, Firebase, Tailwind CSS, Framer Motion

Task board for college students. Post a task, pick one up, and build a reputation as tasks get done. Changes appear for everyone in real time.

Eshop (2025)

TypeScript, Nx, Node.js, Express, Docker, GitHub Actions

Microservices e-commerce backend in an Nx monorepo, in early development. An API gateway sits in front of the services, starting with authentication.

Blogity (2024)

Next.js, NextAuth, Prisma, PostgreSQL, UploadThing, Tailwind CSS
Blogging platform where writers sign in and publish posts with images, and readers can subscribe to a newsletter.

SKILLS

Frontend & mobile
TypeScript, React, Next.js, React Native, Expo, Redux Toolkit, Zustand, Tailwind CSS, Radix UI, Framer Motion, i18next

Backend
Node.js, NestJS, Express, Python, FastAPI, REST APIs, JWT & OAuth, Elasticsearch, Swagger

Data, cloud & tools
PostgreSQL, MySQL, MongoDB, Firebase, AWS (EC2, RDS), Docker, GitHub Actions, EAS Build, Cloudinary, Azure, Git, Linux, Figma

Payments & platform
Apple IAP (StoreKit 2), Cashfree, Push notifications (FCM), Google & Apple sign-in, GST invoicing, PDF & Excel exports

EDUCATION

B.Tech, Electrical Engineering
Haldia Institute of Technology · 2028-08

Intermediate, PCM
Maheshwari Public School · 2023-06
